

Meta Marketing Strategy: Automated Document Collection Platform

Target Audience: Decision makers at real estate companies in Mexico (e.g., Vinte Viviendas Integrales). **Campaign Purpose:** Generate leads (Book a demo).

Phase 2: Strategy Design

Primary Language: Spanish (Localized for Mexico B2B Real Estate)

Campaign Strategy & Structure: We will implement a simplified, modern campaign structure heavily reliant on Meta's machine learning to find the right decision-makers. Since we want to generate B2B software leads, our objective is **Lead Generation (Conversions)** optimizing for the "Book a demo" event on your landing page.

- **Campaign Objective:** Leads (Website Conversions)
- **Budget Strategy:** Campaign Budget Optimization (CBO) to let Meta distribute the budget to the best-performing creatives and audiences, exiting the learning phase faster.
- **Targeting:**
 - **Core Audience:** Advantage+ Audience with a broad age range (28-60) covering all of Mexico.
 - **Audience Suggestions (Signals):** To give the algorithm a starting point, we will input broad B2B signals such as "Bienes raíces", "Desarrollo inmobiliario", "Director ejecutivo", and "Gerente de ventas". However, we will allow Meta to expand beyond these specific interests if it finds conversions elsewhere.
- **Placements:** Advantage+ Placements (Automatic) to ensure we reach decision-makers wherever they are spending their time across Facebook, Instagram, and the Audience Network.

Phase 3: Ad Creative Generation (The New Targeting)

In current media buying, creative is the new targeting. We must rely on our Hooks to filter out the general public and speak directly to Real Estate Directors and Sales Managers. We will use a mix of angles to feed the Advantage+ algorithm.

Concept 1: Logical / Solution-Focused (The Dashboard Angle)

- **Visual Concept:** A clean, professional software UI mockup showing a "Perfil del Cliente" dashboard. It displays a progress bar at 100% and green checkmarks next to realistically named documents: "INE vigente", "Comprobante de Domicilio", "Constancia de Situación Fiscal".
- **The Hook (Image Text):** Deja de perseguir clientes por documentos.
- **Primary Text:** Validar expedientes de compradores toma demasiado tiempo y retrasa tus escrituras. Nuestra plataforma automatiza la recolección por correo y WhatsApp, analiza la vigencia de cada archivo con Inteligencia Artificial y notifica a tu equipo comercial en tiempo real. Cierra ventas más rápido sin perder el control de la información.
- **Headline:** Automatiza los expedientes de tus clientes.
- **Call to Action (CTA):** Solicitar demostración

Concept 2: Emotional / Pain-Point Focused (The Sales Rep Angle)

- **Visual Concept:** A split-screen static image. On the left, a frustrated sales advisor buried in printed papers and a messy desk. On the right, a clean smartphone screen showing an automated WhatsApp chat where a bot gracefully informs a client: "Testamento recibido. Ahora por favor envía tu INE, frente y reverso."
- **The Hook (Image Text):** Tus asesores son para vender, no para cobrar papeles.
- **Primary Text:** El proceso de integración de crédito no debería ser un dolor de cabeza. Libera a tu equipo de ventas de la carga administrativa. Nuestro sistema pide, valida y aprueba los documentos requeridos directamente por los canales que tus clientes ya usan. La IA verifica la autenticidad al instante.
- **Headline:** Acelera tus cierres de venta inmobiliarios.
- **Call to Action (CTA):** Solicitar demostración

Concept 3: Direct Response / Outcome-Focused (The ROI Angle)

INTEGRA EXPEDIENTES COMPLETOS EN TIEMPO RÉCORD

- **Visual Concept:** A sleek, minimalist graphic showing a timeline compressing, or a calendar with days crossed out. Text overlay clearly states the transformation in time saved.
- **The Hook (Image Text):** Integra expedientes completos en tiempo récord.
- **Primary Text:** Las desarrolladoras inmobiliarias pierden semanas revisando identificaciones y comprobantes a mano para cada nuevo contrato. Descubre cómo nuestra herramienta automatizada recolecta y audita documentos bajo la normativa mexicana de forma 100% segura. Reduce el estatus de "esperando al cliente" a unas cuantas horas.
- **Headline:** Software de gestión documental inmobiliaria.
- **Call to Action (CTA):** Reservar cita

Concept 4: Social Proof / Industry Authority (Carousel)

Card 1

Card 2

Privacidad y cumplimiento normativo garantizado

Card 3

- **The Hook (Carousel First Card Text):** Diseñado para alto volumen de ventas.
- **Primary Text:** La plataforma definitiva para empresas de desarrollo y comercialización de vivienda. Olvídate de los expedientes incompletos que frenan tus ingresos. Control centralizado, notificaciones automáticas al cliente final y validación inteligente respaldada por inteligencia artificial.
- **Headline:** Centraliza los documentos de tus compradores.
- **Call to Action (CTA):** Más información

Phase 4: Optimization Guidance

To ensure this strategy is successfully executed, you must focus on the following optimization principles:

1. **Robust Tracking Infrastructure:** Before spending a single peso, ensure the Meta Pixel and Conversions API (CAPI) are correctly installed on your landing page and calendar booking software. Signal quality is the lifeblood of Advantage+ campaigns. Meta needs to know exactly who is booking a demo to find more people like them.

2. Key Metrics to Monitor:

- **Cost Per Action (CPA):** Your ultimate source of truth is your Cost Per Demo Booked.
- **Thumb-stop Ratio (3-second views / Impressions):** If this metric is low (below 25%), your visual hook is failing to grab the attention of the real estate decision-makers. You need to test new image designs before changing the copy.
- **Outbound CTR (Click-Through Rate):** If people are stopping to look but not clicking (below 1%), your Primary Text or Headline is not compelling enough, or the offer (Book a demo) feels like too much friction.
- **Landing Page Conversion Rate:** If CTR is high but CPA is high, the disconnect is happening on your website. Ensure the landing page messaging perfectly matches the promise made in the ad.

3. **Creative Fatigue:** You are launching with 4 diverse concepts. Let them run for at least 3-5 days without touching them to exit the learning phase. Once you identify the winning angle, iterate continuously on that specific concept (new colors, slightly different hook text, different UI mockups) while turning off the losers.
